these physicians collaborate on the same case. The book uses actual case studies from the authors' offices and provides an accurate and real portrayal of the types of skin conditions primary care physicians encounter. Answering questions such as when to treat, how to treat, when to refer, when to biopsy, and when to reassure, this book informs and educates primary care physicians with a dermatologist's perspective. Top 50 Dermatology Case Studies for Primary Care ?gives the reader an entirely new vantage point from which to view dermatologic cases, and together with one of New York City's top

psoriatic arthritis, Crohn's disease and, in severe psoriasis, metabolic syndrome and cardiovascular diseases), which often presents a therapeutic challenge to physicians. Written by renowned experts, this volume gives a comprehensive overview of psoriasis and its various comorbidities. It describes the treatment modalities for mild and moderate-to-severe psoriasis, including topical, phototherapeutic and conventional systemic treatments (e.g. acitretine, methotrexate and cyclosporine), as well as biological therapies (e.g. alefacept, efalizumab, etanercept, adalimumab and

infliximab). The chapters on biological therapies focus on key safety issues. Further chapters focus on such topics as the management of childhood psoriasis and psoriasis in distinctive locations, such as the scalp, face, flexures, palm/soles and nails. Finally, future therapeutic modalities, with the focus on small molecules and potential biological therapies, are discussed. This publication will make significant reading to dermatologists and all physicians dealing with psoriasis, such as general practitioners, psychiatrists, rheumatologists, cardiologists and
