PC components explained: how to create the best computer ...

Ideal computer specifications are determined by your specific use case. For example, how fast your PC needs to be depends on what you plan to do with it. For a gaming PC, a fast processor and sufficient RAM as well as a powerful graphics card prove important. If you plan to use your computer for browsing the web and simple productivity tasks, such as word processing, then a lower-tier budget desktop should suffice.

Buying the Right Desktop PC for Your Needs

Apple computers are preferred for musicians and artists, as they typically run content creation programs much more efficiently than a Windows PC. Linux is an alternate Operating System that is free from costs, copyrights, and viruses. If you are buying a computer with Linux, look out for a System76. Ubuntu is a good distribution to start with.
