~~Ecological Restoration and Global Climate Change~~

Abstract. There is an increasing consensus that global climate change occurs and that potential changes in climate are likely to have important regional consequences for biota and ecosystems. Ecological restoration, including (re)afforestation and rehabilitation of degraded land, is included in the array of potential human responses to climate change.

~~Ecological Restoration and Global Climate Change Harris ...~~

Ecological restoration involves taking care of the environment in ways that will reduce the significant long-term impacts climate change has had on all life worldwide, not to mention on the planet itself. The science also deals with finding ecosystems that have been ravaged or damaged, especially by human activity.

~~Ecological Restoration and Environmental Change by Stuart ...~~

Abstract. One of the means of creating a more robust methodology for ecological restoration involves reducing the gap between ecological theory and restoration practices. A common strategy to do so is using meta-analysis to understand key drivers of restoration outcomes. "Active" and "passive" is a dichotomy often used to separate restoration strategies in such meta-analyses.
