The Dignitas clinic in Switzerland may be a long way away. But the issues around euthanasia can suddenly
become very close to home. To many, it seems remarkable that in a society where freedom of choice is
eulogised, thousands of people find that there is one last choice that they are not free to make. But as
this book will show, euthanasia is an issue at the intersection of new technology, old laws, and
timeless ethical quandaries, so that even apparently clear-cut cases have many contradictions. Drawing
on the latest research and cases from around the world, Richard Huxtable drills deep into the key issues
around euthanasia. His is a new, balanced look at an important issue, and it will appeal to lawyers,
medical students and - most importantly - those who find themselves or their relatives faced with end of
life dilemmas.

philosopher Julian Baggini shows how abstract ideas feed into the most important existential questions of all. He tells the story of Philosophy, bringing together and interlinking all its different areas, to create what is perhaps the first non-historical narrative of the subject -- one that takes you right to its heart. It places philosophy firmly at the centre of what makes us human. From ethics and metaphysics, to the philosophy of science and religion, Baggini explains what makes us different to other species, why philosophy lies at the heart of that difference, and why that matters. This accessible and readable book will appeal to both students and general readers, giving a fascinating taste of philosophy -- and what matters most within it. The All That Matters series: All That Matters books: All books in the All That Matters series are written by world experts in their subject field. These experts work to distil a topic and get right to its heart, making the book accessible for both students and general readers. Each compelling book contains new and interesting perspectives and tells stories that matter. The Author: 'one of our most lucid and accessible popularisers of philosophy' Julian Baggini is a philosopher, author and journalist, who was recently named on the Observer's list of Britain's top public intellectuals. His doctorate was from University College London on the philosophy of personal identity, and his books have been published globally and translated into twelve languages. Baggini is widely regarded as one of our most lucid and accessible popularisers of philosophy. His work appears regularly in the Guardian, Prospect and the New Humanist, and he founded The Philosophers Magazine. Julian has also appeared as a character in an Alexander McCall Smith novel, and been the subject of a question in University Challenge. Keep up with Julian Baggini on his website or follow his Twitter account @microphilosophy . Moral Matters is a concise and accessible look at such ethical issues as euthanasia, animal rights, abortion, and pornography. It provides a focused set of views from the unified perspective of one of North America's leading libertarian thinkers, and aims to provoke thought and discussion as well as to enrich understanding. For the new edition the text has been revised throughout, the introduction has been greatly expanded, and a new chapter on environmental issues has been added.

This is a comprehensive study of euthanasia and assisted suicide. It traces the historical debate, examines the legal status of such activity in different countries and explores the political, medical and moral matters surrounding these emotive and controversial subjects in various cultural contexts. The key advocates and pioneers of this agenda-driven movement (such as the late Jack Kevorkian, popularly known as "Dr. Death" and Philip Nitschke, founder of Exit International) are profiled. Not only are the elderly and disabled becoming increasingly vulnerable but children, psychiatric patients, the depressed and those who are simply tired of life are now on a slippery slope into a dystopian nightmare. The spotlight is brought to bear on the Netherlands, in particular, where palliative care and the hospice movement are greatly underdeveloped as a result of legalization. These dubious "services" are now offered as part of "normal" medical care in Holland where it is deemed more cost-effective to be given a lethal injection. The vital role of physicians as healers in society must be preserved and the important but neglected spiritual dimension of death must be explored. Thus a biblical view of human life is presented. Death and bereavement are universal phenomena and people of all faiths and those of none have a legitimate right to comment. However, the historic Christian tradition is struggling to be heard in the clamor for personal autonomy and civil liberties in a multi-cultural society that is becoming increasingly secular. This work provides an ethical framework in which euthanasia and assisted suicide can be evaluated. These issues are on the radar indicating a collision course with Christian values. It is time for Christians to be alert and to present the case that these are not satisfactory solutions to legitimate end-of-life concerns.

The moral issues involved in doctors assisting patients to die with dignity are of absolutely central concern to the medical profession, ethicists, and the public at large. The debate is fuelled by cases that extend far beyond passive euthanasia to the active consideration of killing by physicians. The need for a sophisticated but lucid exposition of the two sides of the argument is now urgent. This book supplies that need. Two prominent philosophers, Gerald Dworkin and R. G. Frey present the case for legalization of physician-assisted suicide. One of the best-known ethicists in the US, Sissela Bok, argues the case against.

DOES TERRORISM WORK? Terrorism is surrounded by myths. One of the most enduring of these myths and half-truths is that terrorism never works; that in the end, the state will prevail and the terrorists will either be dead or imprisoned or otherwise forced to end their campaign of violence. It is true that most terrorist groups are beaten. Within twelve months of their first attack most terrorist groups have been crushed. Within ten years half of the rest have been beaten. However, a small proportion - roughly one group in twenty - endures and incredibly goes on to win the conflict and beat the governments opposing them. This book is about these triumphs of terror, how and why they happen and what the beaten governments could and should have done differently. It is a book about blunders and miscalculations, of the danger of underestimating a weak enemy and the hubris of empire. It encompasses tales of courage and despair, ruthlessness and tragedy, brutality and hope. In the end, it represents not just one but many warnings from history. About the care that is needed when confronted with terrorism and about just how badly events can go for even the most powerful state if they get it wrong. ABOUT THE SERIES All That Matters books are written by the world's leading experts to introduce the most exciting and relevant topics in an accessible, readable way.
