GROW BOUNTIFUL ORGANIC CROPS while improving the biodiversity of your farm by making your land a welcoming place for native beneficial insects. Mantids, stink bugs, beetles, flies, wasps, and many others prey upon crop pests, reducing or eliminating the need for chemical pesticides.

Farming with Native Beneficial Insects: Ecological Pest ...

Raising Insects for Profit. Insect farming has rapidly grown over the last decade, and now is a multimillion dollar industry. It wasn’t too long ago that insects were solely bred for pets and zoos... but this is changing as the “Insect Food Revolution” takes off. Pound for pound, insects are the most efficient way to produce animal protein for humans.

Raising Insects For Profit - Extra Income Over 55

The text offers an introduction and overview to the concept of farming using biocontrol, that is, using beneficial plants and insects to do the job formerly managed by pesticides. The text is divided into five main parts, the first part discussing the concept of beneficial insect ecology.
