Financial Accounting: an introduction offers CA stream students a strong conceptual framework in preparation for further studies in Accounting, while teaching non-CA stream students financial literacy, a skill that will benefit them in both their personal and professional lives.

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Every German student of business administration needs to have a basic understanding of accounting according to German GAAP, and thanks to globalization many courses about German accounting are nowadays held in English to improve the language skills of the students. In addition many foreign subsidiaries of German companies have to prepare their part of consolidated financial statements according to German GAAP. So far, these professionals can rely on German literature only. The first part of the book offers a compact introduction to financial statements according to German GAAP, the second part comprises exercises on individual topics with solutions and case studies for in-depth and effective learning. This introduction provides ideal support for German-speaking students taking English-speaking lectures in the field and is furthermore valuable for professionals looking for explanations when preparing the data for consolidated financial statements. Includes exercises and case studies for practice Ideal textbook for students of German Universities attending English-speaking lectures in financial management Ideal introduction for professionals with a succinct explanation and additional support with a glossary and vocabulary

With its widely popular conceptual approach, this classic textbook has been revised in full color and will continue to be the leader in its field. The text incorporates many real-world examples and financial statement as well as integrating international topics throughout the text. Ideal for the graduate level, the text's authoritative user-orientation teaches students to interpret and understand financial information in a changing business environment.

This 6th edition retains all of the classic features that have contributed to the book's success: clarity of expression, the focus on the accounting equation, student activities and real-life commentaries running through each chapter, and the inclusion of the Safe and Sure Annual Report as an example of a listed company.

Financial Accounting: An Introduction presents an expansive and up-to-date treatment of an ever-important discipline. Without over-simplifying the subject, Augustine Benedict and Barry Elliott have created a progressive guide to financial accounting which tackles not only the fundamentals, but also includes coverage of new and emerging topics - chief among them IFRS. Comprehensive and rigorous, Financial Accounting encompasses a number of perspectives, ensuring that every aspect of each topic is examined in depth. Starting from the first concepts, the authors proceed to show how issues in financial accounting affect individuals, banking practices, sole traders, partnerships, and limited companies.

Financial Accounting: An Introduction 4e does not simply teach the accounting standards; it demonstrates that accounting is about 'how to' as well as 'why to' record and report information in a way that engages directly with Generation Y students.
