Inner Paths to Outer Space presents an innovative examination of how we can reach these other dimensions of existence and contact otherworldly beings. Based on their more than 60 combined years of research into the function of the brain, the authors reveal how psychoactive substances such as DMT allow the brain to bypass our five basic senses to unlock a multidimensional realm of existence where otherworldly communication occurs.

An investigation into experiences of other realms of existence and contact with otherworldly beings – Examines how contact with alien life-forms can be obtained through the “inner space” dimensions of our minds – Presents evidence that other worlds experienced through consciousness-altering technologies are often as real as those perceived with our five senses – Correlates science fiction’s imaginal realms with psychedelic research For thousands of years, voyagers of inner space--spiritual seekers, shamans, and psychoactive drug users--have returned from their inner imaginal travels reporting encounters with alien intelligences. Inner Paths to Outer Space presents an innovative examination of how we can reach these other dimensions of existence and contact otherworldly beings. Based on their more than 60 combined years of research into the function of the brain, the authors reveal how psychoactive substances such as DMT allow the brain to bypass our five basic senses to unlock a multidimensional realm of existence where otherworldly communication occurs. They contend that our centuries-old search for alien life-forms has been misdirected and that the alien worlds reflected in visionary science fiction actually mirror the inner space world of our minds. The authors show that these “alien” worlds encountered through altered states of human awareness, either through the use of psychedelics or other methods, possess a sense of reality as great as, or greater than, those of the ordinary awareness perceived by our five senses.

A clinical psychiatrist explores the effects of DMT, one of the most powerful psychedelics known. A behind-the-scenes look at the cutting edge of psychedelic research. Provides a unique scientific explanation for the phenomenon of alien abduction experiences. From 1990 to 1995 Dr. Rick Strassman conducted U.S. Government-approved and funded clinical research at the University of New Mexico in which he injected sixty volunteers with DMT, one of the most powerful psychedelics known. His detailed account of those sessions is an extraordinarily riveting inquiry into the nature of the human mind and the therapeutic potential of psychedelics. DMT, a plant-derived chemical found in the psychedelic Amazon brew, ayahuasca, is also manufactured by the human brain. In Strassman's volunteers, it consistently produced near-death and mystical experiences. Many reported convincing encounters with intelligent nonhuman presences, aliens, angels, and spirits. Nearly all felt that the sessions were among the most profound experiences of their lives. Strassman's research connects DMT with the pineal gland, considered by Hindus to be the site of the seventh chakra and by Rene Descartes to be the seat of the soul. DMT: The Spirit Molecule makes the bold case that DMT, naturally released by the pineal gland, facilitates the soul's movement in and out of the body and is an integral part of the birth and death experiences, as well as the highest states of meditation and even sexual transcendence. Strassman also believes that "alien abduction experiences" are brought on by accidental releases of DMT. If used wisely, DMT could trigger a period of remarkable progress in the scientific exploration of the most mystical regions of the human mind and soul.

Naturally occurring DMT may produce prophecy-like states of consciousness and thus represent a bridge between biology and religious experience Reveals the striking similarities between the visions of the Hebrew prophets and the DMT state described by Strassman's research volunteers Explains how prophetic and psychedelic states may share biological mechanisms Presents a new top-down "theoneurological" model of spiritual experience After completing his groundbreaking research chronicled in DMT: The Spirit Molecule, Rick Strassman was left with one fundamental question: What does it mean that DMT, a simple chemical naturally found in all of our bodies, instantaneously opens us to an interactive spirit world that feels more real than our own world? When his decades of clinical psychiatric research and Buddhist practice were unable to provide answers to this question, Strassman began searching for a more resonant spiritual model. He found that the visions of the Hebrew prophets--such as Ezekiel, Moses, Adam, and Daniel--were strikingly similar to those of the volunteers in his DMT studies. Carefully examining the concept of prophecy in the Hebrew Bible, he characterizes a "prophetic state of consciousness" and explains how it may share biological and metaphysical mechanisms with the DMT effect. Examining medieval commentaries on the Hebrew Bible, Strassman reveals how Jewish metaphysics provides a top-down model for both the prophetic and DMT states, a model he calls "theoneurology." Theoneurology bridges biology and spirituality by proposing that the Divine communicates with us using the brain, and DMT--whether naturally produced or ingested--is a critical factor in such visionary experience. This model provides a counterpoint to "neurotheology," which proposes that altered brain function simply generates the impression of a Divine-human encounter. Theoneurology addresses issues critical to the full flowering of the psychedelic drug experience. Perhaps even more important, it points the way to a renewal of classical prophetic consciousness, the soul of Hebrew Bible prophecy, as well as unexpected directions for the evolution of contemporary spiritual practice.

How can we think of art history as a discipline that moves process-based, performative, and cultural migratory movement to the center of its theoretical and methodical analyses? With contributions from internationally renowned experts, this manual, for the first time, provides answers as to what consequences the interaction of migration and globalization has on research in the field of the science of art, on curatory practice, and on artistic production and theory. The objective of this multi-vocal anthology is to open up an interdisciplinary discourse surrounding the increased focus on the phenomenon of migration in art history.

CENSORED FOR CENTURIES BY THE CHURCH WITH THE BACKING OF WORLD LEADERS! Is There A Golden Paradise Inside Our Earth? Who Pilots The Ships We Call UFOs? Are They Here To Harm Or Help Us? Are the Residents Of This Subterranean World Angels or Devils? Quietly -- without public fanfare -- scientists search for the entrance to the inner earth. Such a discovery could possibly improve all our lives. . . as well as provide an endless source for fossil fuel. It could be that mankind may not be alone on this planet. Scripture actually speaks of a paradise inside the earth inhabited by giant plants, mythological creatures and even highly advanced human-like beings. Further, UFOs do exist, but only some of them come from outer space. And the ones that do come here from other planets may not be entirely friendly. We may have to learn to protect ourselves from their ungodly influences and desires. The author, William L. Blessing is a full gospel minister who wants to share vital information with you! Based on Scripture, Rev. Blessing is convinced that there are "three heavens that belong to the earth. The Apostle Paul tells us that he was 'caught up to the third heaven' and while in that heaven he 'heard unspeakable words which is not lawful for a man to utter.'" Blessing states that this area of "darkness" is inhabited by a very evil people. Beyond the darkness is the moon and then the asteroid or planetoid ring of inhabited places -- inhabited by the outer space people. Beyond this first heaven is a vaporous ring in which they are great quantities of ice." According to Blessing, "The Bible teaches us that there are people dwelling in the inside of the earth. For want to a better name I shall call them Inner Earth People. I would estimate the population of the inner earth to be ten billion, or about five times more than those of us who live on the surface. "There are 200,000,000 pilots in the flying saucer corps in the inner earth. The name of their commander in chief is Apollyon, whose name in the Hebrew tongue is Abaddon, but in the Greek tongue hath is his name Apollyon." Blessing states: "They will soon, very soon, invade the surface of the earth. In fact, I believe that the invasion has already begun by an advance reconnaissance force that is flying out and over the surface, mapping the land areas and strategic places where they will strike in their all-out invasion!"

Psychedelic Shamanism presents the spiritual and shamanic properties of psychotropic plants and discusses how they can be used to understand the structure of human consciousness. Author Jim DeKorne offers authoritative information about the cultivation, processing, and correct dosages for various psychotropic plant substances including the belladonna alkaloids, d-lysergic acid amide, botanical analogues of LSD, mescaline, ayahuasca, DMT, and psilocybin. Opening with vivid descriptions of the author's personal experiences with psychedelic drugs, the book describes the parallels that exist among shamanic states of consciousness, the use of psychedelic catalysts, and the hidden structure of the human psyche. DeKorne suggests that psychedelic drugs allow us to examine the shamanic dimensions of reality. This worldview, he says, is ubiquitous across space, time, and culture, with individuals separated by race, distance, and culture routinely describing the same core reality that provides powerful evidence of

the dimensional nature of consciousness itself. The book guides the reader through the imaginal realm underlying our awareness, a world in which spiritual entities exist to reconnect us with ourselves, humanity, and our planet. Accurate drawings of plants, including peyote, Salvia divinorum, and San Pedro, enhance the book's usefulness.

Joseph Levy leads a quiet life in rural Wheaton Arizona. Retired from a long career in psychiatric research and practice, he reads, writes, and walks in the mountains and hills near the Native reservation. His quiet life ends, however, when a dental crown replacement causes trouble just before meeting an internet date in California. Thus begins a year of back-to-back nightmare infections, a drug overdose, and two failed relationships. At every step, Levy is confronted by matters of life and death, love and hate, faith and doubt, trust and betrayal. Most of all, he faces what it means to be sick and to be healthy. He prays to his God, relies on his friends, examines his dreams, and entrusts his psyche to a new therapist. Joseph Levy Escapes Death is a tale of perseverance in the face of adversity. Strassman uses several lenses to view Levy's life: medical, psychoanalytic, and religious--both Buddhist and Jewish. Pathos and humor fill the tale, while enlightening detours examine the Holocaust, cardiovascular physiology and microbiology, and Jewish-Christian relations.

Cutting-edge explorations and discussions of DMT experiences and plant sentience from leading luminaries in the field of psychedelic research □ Includes contributions from Rupert Sheldrake, Rick Strassman, Dennis McKenna, Graham Hancock, Jeremy Narby, Erik Davis, Peter Meyer, David Luke, and many others □ Explores DMT beings, plant sentience, interspecies communication, discarnate consciousness, dialoguing with the divine, the pineal gland, the Amazonian shamanic perspective on Invisible Entities, and the science behind hallucinations Encounters with apparently sentient beings are reported by half of all first time users of the naturally occurring psychedelic DMT, yet the question of DMT beings and plant sentience, interspecies communication, discarnate consciousness, and perhaps even dialoguing with the divine has never been systematically explored. In September 2015, ten of the world's leading luminaries noted for exploring the mysterious compound DMT (dimethyltryptamine) gathered with other researchers at Tyringham Hall in England to discuss the subject. Over three days, they pooled their expertise from a wide range of subjects--archaeology, anthropology, religious studies, psychology, neuroscience, chemistry, and psychopharmacology, to name a few--to explore the notion of "entheogenic plant sentience" and the role of DMT as a conduit between Spirit and Matter. Offering cutting-edge insights into this visionary domain, this book distills the potent exchange of ideas that occurred at Tyringham Hall, including presentations and discussions on DMT entities, the pineal gland, the possibility of DMT as a chemical messenger from an extraterrestrial civilization, the Amazonian shamanic perspective on Invisible Entities, morphic resonance, and the science behind hallucinations. Contributors to the talks and discussions include many leading thinkers in this field, including Rupert Sheldrake, Rick Strassman, Dennis McKenna, Graham Hancock, Jeremy Narby, Erik Davis, Ede Frecska, Luis Eduardo Luna, Bernard Carr, Robin Carhart-Harris, Graham St. John, David Luke, Andrew Gallimore, Peter Meyer, Jill Purce, William Rowlandson, Anton Bilton, Vimal Darpan, Santha Faiia, and Cosmo Feilding Mellen.
