The New York Times bestselling book about the early development, growth, and exercise of leadership from Pulitzer Prize-winning author Doris Kearns Goodwin should help us raise our expectations of our national leaders, our country, and ourselves (The Washington Post). After five decades of magisterial output, Doris Kearns Goodwin leads the league of presidential historians (USA TODAY). In her inspiring (The Christian Science Monitor) Leadership, Doris Kearns Goodwin draws upon the four presidents she has studied most closely--Abraham Lincoln, Theodore Roosevelt, Franklin D. Roosevelt, and Lyndon B. Johnson (in civil rights)--to show how they recognized leadership qualities within themselves and were recognized as leaders by others. By looking back to their first entries into public life, we encounter them at a time when their paths were filled with confusion, fear, and hope. Leadership tells the story of how they all collided with dramatic reversals that disrupted their lives and threatened to shatter forever their ambitions. Nonetheless, they all emerged fitted to confront the contours and dilemmas of their times. At their best, all four were guided by a sense of moral purpose. At moments of great challenge, they were able to summon their talents to enlarge the opportunities and lives of others. Does the leader make the times or do the times make the leader? If ever our nation needed a short course on presidential leadership, it is now (The Seattle Times). This seminal work provides an accessible and essential road map for aspiring and established leaders in every field. In today's polarized world, these

stories of authentic leadership in times of apprehension and fracture take on a singular urgency. "Goodwin's volume deserves much praise—it is insightful, readable, compelling: Her book arrives just in time" (The Boston Globe).

"The blow by blow story of a president and his team wasting the "opportunity" of the Great Recession to change the fundamentals of the economy."—Steven Brill, New York Times bestselling author This book is the compelling story of President Obama's domestic policy decisions made between September 2008 and his inauguration on January 20, 2009. Barack Obama determined the fate of his presidency before he took office. His momentous decisions led to Donald Trump, for Obama the worst person imaginable, taking his place eight years later. This book describes these decisions and discusses how the results could have been different. Based on dozens of interviews with actors in the Obama transition, as well as the author's personal observations, this book provides unique commentary of those defining decisions of winter 2008-2009. A decade later, the ramifications of the Great Recession and the role of government in addressing the crisis animate the ideological battle between progressivism and neoliberalism in the Democratic Party and the radical direction of the Republican Party. As many seek the presidency in the November 2020 election, all candidates and of course the eventual winner will face decisions that may be as critical and difficult as those confronted by Barack Obama. This book aims to provide the guidance of history. "A powerfully lucid, compelling and surprising achievement . . . makes a subtle but irresistible argument that, given the conservative undertow of American politics, liberals and progressives who are serious about change can't just wing it but must prepare detailed economic policy analyses and prescriptions long in advance of taking power."—Congressman Jamie Raskin, Representative from Maryland's 8th District

The Presidents Club, established at Dwight Eisenhower's inauguration by Harry Truman and Herbert Hoover, is a complicated place: its members are bound forever by the experience of the Oval Office and yet are eternal rivals for history's favor. Among their secrets: How Jack Kennedy tried to blame Ike for the Bay of Pigs. How Ike quietly helped Reagan win his first race in 1966. How Richard Nixon conspired with Lyndon Johnson to get elected and then betrayed him. How Jerry Ford and Jimmy Carter turned a deep enmity into an alliance. The unspoken pact between a father and son named Bush. And the roots of the rivalry between Clinton and Barack Obama. Time magazine editors and presidential historians Nancy Gibbs and Michael Duffy offer a new and revealing lens on the American presidency, exploring the club as a hidden instrument of power that has changed the course of history.

Americans constantly make moral judgments about presidents and foreign policy. Unfortunately, many of these assessments are poorly thought through. A president is either praised for the moral clarity of his statements or judged solely on the results of their actions. In *Do Morals Matter?*, Joseph S. Nye, Jr., one of the world's leading scholars of international relations, provides a concise yet penetrating analysis of the role of ethics in US foreign policy during the American era after 1945. Nye works through each presidency from FDR to Trump and scores their foreign policy on three ethical dimensions of their intentions, the means they used, and the consequences of their decisions. Alongside this, he also evaluates their leadership qualities, elaborating on which approaches work and which ones do not. Regardless of a president's policy preference, Nye shows that each one was not fully constrained by the structure of the system and actually had choices. He further notes the important ethical consequences of non-actions, such as Truman's willingness to accept stalemate in Korea rather than use nuclear weapons. Since we so often apply moral reasoning to foreign policy, Nye suggests how to do it better. Most importantly, presidents need to factor in both the political context and the availability of resources when deciding how to implement an ethical policy—especially in a future international system that presents not only great power competition from China and Russia, but a host of transnational threats: the illegal drug trade, infectious diseases, terrorism, cybercrime, and climate change.

"From master storyteller and historian H.W. Brands, twice a finalist for the Pulitzer Prize, comes the riveting story of how President Harry Truman and General Douglas MacArthur squared off to decide America's future in the aftermath of World War II. At the height of the Korean War, President Harry S. Truman committed a gaffe that sent shock waves around the world. When asked by a reporter about the possible use of atomic weapons in response to China's entry into the war, Truman replied testily, 'The military commander in the field will have charge of the use of the weapons, as he always has.' This suggested that General Douglas MacArthur, the willful, fearless, and highly decorated commander of the American and U.N. forces, had his finger on the nuclear trigger. A correction quickly followed, but the damage was done; two visions for America's path forward were clearly in opposition, and one man would have to make way. Truman was one of the most unpopular presidents in American history. Heir to a struggling economy, a ruined Europe, and increasing tension with the Soviet Union, on no issue was the path ahead clear and easy. General MacArthur, by contrast, was incredibly popular, as untouchable as any officer has ever been in America. The lessons he drew from World War II were absolute: appeasement leads to disaster and a showdown with the communists was inevitable--the sooner the better. In the nuclear era, when the Soviets, too, had the bomb, the specter of a catastrophic third World War lurked menacingly close on the horizon. The contest of wills between these two titanic characters unfolds against the turbulent backdrop of a faraway war and terrors conjured at home by Joseph McCarthy. From the drama of Stalin's blockade of West Berlin to the daring landing of MacArthur's forces at Inchon to the shocking entrance of China into the war, *The General and the President* vividly evokes the making of a new American era"--

**NEW YORK TIMES BESTSELLER** "From the veteran political journalist and 60 Minutes correspondent, a deep dive into the history, evolution, and current state of the American presidency, and how we can make the job less impossible and more productive"featuring a new post-2020"election epilogue "This is a great gift to our sense of the actual presidency, a primer on leadership."—Ken Burns Imagine you have just been elected president. You are now commander-in-chief, chief executive, chief diplomat, chief legislator, chief of party, chief voice of the people, first responder, chief priest, and world leader. You're expected to fulfill your campaign promises, but you're also expected to solve the urgent crises of the day. What's on your to-do list? Where would you even start? What shocks aren't you thinking about? The American presidency is in trouble. It has become overburdened, misunderstood, almost impossible to do. "The problems in the job unfolded before Donald Trump was elected, and the challenges of governing today will confront his successors," writes John Dickerson. After all, the founders never intended for our system of checks and balances to have one superior Chief Magistrate, with Congress demoted to "the little brother who can't keep up." In this eye-opening book, John Dickerson writes about presidents in history such as Washington, Lincoln, FDR, and Eisenhower, and in contemporary times, from LBJ and Reagan and Bush, Obama, and Trump, to show how a complex job has been done, and why we need to reevaluate how we view the presidency, how we choose our presidents, and what we expect from them once they are in office. Think of the presidential campaign as a job interview. Are we asking the right questions? Are we looking for good campaigners, or good presidents? Once a candidate gets the job, what can they do to thrive? Drawing on research and interviews with current and former White House staffers, Dickerson defines what the job of president actually entails, identifies the things that only the president can do, and analyzes how presidents in history have managed the burden. What qualities make for a good president? Who did it well? Why did Bill Clinton call the White House "the crown jewel in

the American penal system? The presidency is a job of surprises with high stakes, requiring vision, management skill, and an even temperament. Ultimately, in order to evaluate candidates properly for the job, we need to adjust our expectations, and be more realistic about the goals, the requirements, and the limitations of the office. As Dickerson writes, "Americans need their president to succeed, but the presidency is set up for failure. It doesn't have to be."

A riveting, deeply personal account of history in the making—from the president who inspired us to believe in the power of democracy #1 NEW YORK TIMES BESTSELLER " NAACP IMAGE AWARD NOMINEE " NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post " Jennifer Szalai, The New York Times " NPR " The Guardian " Marie Claire In the stirring, highly anticipated first volume of his presidential memoirs, Barack Obama tells the story of his improbable odyssey from young man searching for his identity to leader of the free world, describing in strikingly personal detail both his political education and the landmark moments of the first term of his historic presidency—a time of dramatic transformation and turmoil. Obama takes readers on a compelling journey from his earliest political aspirations to the pivotal Iowa caucus victory that demonstrated the power of grassroots activism to the watershed night of November 4, 2008, when he was elected 44th president of the United States, becoming the first African American to hold the nation's highest office. Reflecting on the presidency, he offers a unique and thoughtful exploration of both the awesome reach and the limits of presidential power, as well as singular insights into the dynamics of U.S. partisan politics and international diplomacy. Obama brings readers inside the Oval Office and the White House Situation Room, and to Moscow, Cairo, Beijing, and points beyond. We are privy to his thoughts as he assembles his cabinet, wrestles with a global financial crisis, takes the measure of Vladimir Putin, overcomes seemingly insurmountable odds to secure passage of the Affordable Care Act, clashes with generals about U.S. strategy in Afghanistan, tackles Wall Street reform, responds to the devastating Deepwater Horizon blowout, and authorizes Operation Neptune's Spear, which leads to the death of Osama bin Laden. A Promised Land is extraordinarily intimate and introspective—the story of one man's bet with history, the faith of a community organizer tested on the world stage. Obama is candid about the balancing act of running for office as a Black American, bearing the expectations of a generation buoyed by messages of "hope and change," and meeting the moral challenges of high-stakes decision-making. He is frank about the forces that opposed him at home and abroad, open about how living in the White House affected his wife and daughters, and unafraid to reveal self-doubt and disappointment. Yet he never wavers from his belief that inside the great, ongoing American experiment, progress is always possible. This beautifully written and powerful book captures Barack Obama's conviction that democracy is not a gift from on high but something founded on empathy and common understanding and built together, day by day.
