DURHAM, N.C. -- A team of Duke University researchers has developed a lab-grown living lung model that mimics the tiny air sacs of the lungs where coronavirus infection and serious lung damage take place. This advance has enabled them to watch the battle between the SARS-CoV-2 coronavirus and lung cells at the finest molecular scale.

See a GP if you have symptoms of lung cancer, such as breathlessness or a persistent cough.. The GP will ask about your general health and your symptoms. They may examine you and ask you to breathe into a device called a spirometer, which measures how much air you breathe in and out.. You may be asked to have a blood test to rule out some of the possible causes of your symptoms, such as a ...
